

**REMARKS - General**

By the above amendment, Applicants have amended the title to emphasize the novelty of the invention. The claims have been modified based on the Section 112 rejections. The new claims product a novel and unique invention that is not obvious to someone skilled in the art even in light of Natori, et al. US2004/0060036 in view of Bohrer US 6,106,569. The applicant states that the invention's use of bi-directional communication means is unique and novel to this application.

Also applicants have rewritten all claims to define the invention more particularly and distinctly so as to overcome the technical rejections and define the invention patentably over the prior art.

**Conclusion**

For all of the above reasons, applicant submits that the specification and claims are now in proper form, and that the claims all define patentably over prior art. Therefore the applicant submits that this application is now in condition for allowance, which action is respectfully solicited.

**Conditional Request For Constructive Assistance**

Applicant has amended the specification and claims of this application so that they are proper, definite, and define novel structure which is also unobvious. If, for any reason, this application is not believed to be in full condition for allowance, applicant respectfully requests the constructive assistance and suggestions of the Examiner pursuant to M.P.E.P § 707.03(d) and § 707.07(j) in order that the undersigned can place this application in allowable condition as soon as possible and without the need for further proceedings.

Respectfully submitted,

Jeffrey M. Furr, Esq.
